Education

California State University, Northridge   Expected May 2025
Bachelor of Science in Computer Science   *Northridge, CA*
- **Relevant Coursework:** Data Structures, Algorithm Design and Analysis, Software Engineering, Networks & Security, Probability & Statistics, Linear Algebra, Computer Architecture and Hardware

Experience

Los Angeles County Museum of Art   Sep 2022 – Mar 2023
Computerized Maintenance Management Software Intern   *Los Angeles, CA*
- Implemented a dashboard to track detailed activity across thousands of work orders reducing costs by 20%.
- Migrated help desk software for LACMA to efficiently schedule maintenance achieving a 100% success rate for undertaking system critical tasks.
- Created documentation and instruction for 4 system admins on migrated software and solutions to common problems and tasks.

California State University, Northridge   Sep 2023 – Present
Student Assistant   *Northridge, CA*
- Assist students, staff and faculty daily with printing and common computer troubleshooting.
- Regularly maintain 7 workstation printers with ink and printer refills and troubleshoot jams and technical errors.

Glendale Community College   Sep 2021 - Sep 2023
Student Technician   *Glendale, CA*
- Created and maintained a database of 300 companies for volunteering using MS Access.
- Facilitated communication and access between administrators and students to match companies.
- Acted as a liaison between Glendale College and various companies in order to provide up-to-date information.

Projects

Shakespeare NLP Model | *Python, NumPy, NLTK*
- Trained a natural language processing model on 40,000 lines of Shakespeare's texts.
- Utilized Term Frequency-Inverse Document Frequency to vectorize the user's input and uses cosine similarity to generate a cohesive response from the dataset.

Drawn Digits Identifier | *Python, TensorFlow*
- Trained a convolutional neural network on MNIST's dataset of handwritten digits to a loss of 0.3066.
- Identification accuracy reached 97% when tested against MNIST's test set.
- Real world simulation identified 60% of 18 user-generated drawings.

Skincare Ecommerce | *React.js, Bootstrap, Spring Boot, Stripe, Axios, MongoDB*
- Led the development of a fully responsive fullstack website revolving around skincare products.
- Site employs a RESTful API and a Mongo database in order to efficiently display 1100 items reducing load on the client's machine.
- Spring security and safe handling of client data via Stripe and server-side encryption.

The Movie Buff | *React.js, Spring Boot, Axios, MongoDB, Bootstrap*
- Implemented a robust RESTful API for seamless data communication between user created reviews and the database.
- Movie data stored with MongoDB using JSON files and controlled by a Maven application while ensuring data security and access control.

Technical Skills

Languages: C++, Java, JavaScript, Python
Technologies: Git, React, Node.js, Spring Boot, TensorFlow, PyTorch, Bootstrap, Axios, MongoDB, Google Cloud, AWS, Jupyter, Jira, Docker, Kubernetes
Concepts: Compiler, Operating System, Virtual Memory, Cache Memory, Encryption, Decryption, Artificial Intelligence, Machine Learning, CI/CD, Neural Networks, API, Agile Methodology, Cloud Computing, Software Development
